

September – October 2023

The DuPont Dispatch

Important Numbers:

DuPont City Hall:

(253) 964-8121

Open Monday -Thursday

9:00am to 4:00pm

Police & Non-Emergency Line:

(253) 287-4455

Lakewood Animal Control:

(253) 830-5010

LeMay Refuse/Recycling Service:

(253) 875-5053

Northwest Landing ROA:

(253)964-1289

MAYOR:

Ronald J. Frederick

DUPONT CITY COUNCIL 2023:

Deputy Mayor Mike Winkler

Councilmember Maame Bassaw

Councilmember Beth Elliott

Councilmember Penny Coffey

Councilmember Sonia Garza

Councilmember Kevin Ballard

Councilmember Susan Walton

Message from the Mayor

Hello neighbors: By the time you read this message, there will be new playground equipment in three of our beautiful parks in the City of DuPont. The new playground areas are in Clocktower Park, Edmonds Village, and Sellers Park. The one at Clocktower Park has a historical theme that fits in well with the various events the city holds at that location.

The City Council is having a joint meeting with the Parks and Recreation Commission on September 12th as we look to increase Parks and Recreation facilities in DuPont. We have heard from residents asking for things like a skateboard park, pickleball courts, and a spray park, which are some of the more popular requests. Some items we can start on soon, and others will have to wait for additional funding. These items will be discussed at the September 12th meeting, and you are welcome to attend the meeting in person or join in online.

During the month of August, we welcomed new Fire Chief Mickey Gillie to DuPont. He will be a great asset to our city and, coming from Eastern Washington, has experience with wildfires. DuPont is not immune from the threat of wildfire, as seen recently in Maui and Fort Steilacoom Park. Please do an evaluation of your own residence regarding fire safety.

We have had an eventful summer with many exciting activities in the city, including the 4th of July Celebration, the Farmers Market, the SequaliShoot Photo Challenge, the Mayor's Cup Scramble, and DuPont-Hudson's Bay Heritage Days, to name a few. I hope you had the opportunity to participate in these fun events.

Warm regards,

Ron
Ronald J. Frederick
Mayor, City of DuPont

You can support stormwater management projects in your community that both benefit the environment and bring value to the community. Local schools, parks, and private institutions can do a lot to reduce the impact from rainfall on rivers, lakes, and streams:

- Rain gardens and bioretention areas absorb rain before it runs into the street.

- Green roofs help keep water from running off buildings.
- Replacing walkways with pavement that is permeable allows water to soak into the ground.

While you're enjoying local parks and waterways, don't forget to do your part! Pick up after pets—and yourself—and never dump liquids down storm drains. We can all do our part to be stormwater smart!

BE STORMWATER SMART

Take Steps to Protect Our Waterways

If you've been thinking about reducing your environmental footprint, you can take steps to decrease the amount of pollution that flows from your home into local waterways every time it rains. Known as stormwater, once rain or snow hits the ground, it can carry dirt, chemicals, and other pollutants downstream from your home and yard to the rivers and lakes in your community. Here are a just a few steps you can take to be stormwater smart at home:

Rain is great for your lawn, but excess rain can run off from your yard and walkways into the street, where it flows from the storm drain into local rivers, lakes, or streams, taking any chemical you've applied with it.

- Apply fertilizers and pesticides carefully on your lawn or garden and not on pavement.
- Avoid using fertilizers and pesticides completely if rain is in the forecast.
- Consider installing a rain garden, which is a depressed area planted with grasses or perennials that collects stormwater.

- Wash your car with biodegradable soap to avoid chemicals floating downstream, or visit a carwash.
- Direct water from downspouts and car washing to grassy areas, so it can soak into the ground rather than hit the pavement.
- Don't hose down your driveway and flush dirt down the storm drain.
- When watering your lawn, direct the spray toward your lawn and plants, not the pavement.
- Look for spots on the ground that indicate your car leaks oil or fluid. Don't let your leaks pollute!

- Use permeable pavers instead of hard stones or pavement in your yard to help water absorb into the ground.
- Don't rake leaves or yard clippings into the storm drain to avoid clogs and debris that could cause flooding.
- Install a rain barrel to help prevent rain from flowing into storm drains (and also save water for dry spells!).

- Pick up pet waste and keep trash and dirty water away from pavement and storm drains, where it can contaminate stormwater that flows downstream.
- During colder weather, avoid oversalting your sidewalks and use an appropriate amount of deicer—a little goes a long way.
- Sweep sidewalks and put the debris in the trash.

DID YOU KNOW?

If you use a rain barrel to collect water for plants, you can keep your landscape green for free. Every time it rains, you'll collect water that can be used later! Check out www.epa.gov/watersense for more tips to save water!
