Re: Tree Report of all Forest Trees within Affinity Project @ DuPont, Washington  
as of May 28, 2024

Dear Mr. Goudge:

As you authorized, Professional Forestry Services, Inc. have inspected all the trees on the site being developed (7.94 acres). See Exhibit I and II. The following information is for your use during the completion of your Landscape Plan:

## I. LOCATION

The project site is located in the City of DuPont, Washington, south of Meyer Street near Patriot's Landing.

## II. FOREST TYPE

Most of the area is vacant land with Scotch broom and open area disturbed by the previous owner. Along the westerly portions of the property, pockets of Douglas-fir and Oregon Oak are located. The trees are considered healthy and in good condition. The trees are listed from #13 thru #47 and the six landmark Douglas-fir are included. Only landmark Douglas-fir are shown on Map Exhibit I.

## III. TREES TO BE RETAINED

On Exhibit I-2 is a list of all trees indicating those trees planned for retention or removal.

#### **IV. LANDMARK TREES**

		<u>Total</u>
Douglas-fir	30" DBH & Larger =	6
		<u>Retained</u>
Landmark Douglas-fir =		4
Other specimen, Douglas-fir and Oregon Oak =		21

#### **V. FOUR (4) TREE PER ACRE REGULATION**

The project is required to retain at least four trees per acre. Project area is 7.94 acres x 4 trees = 32 trees.

Total trees retained (Landmark and others) = 25.

The Landscape Plan will need to include planting seven additional trees to meet the city code for retention.

#### **VI. SPECIAL CIRCUMSTANCES**

- A. The actual civil design has been engineered to protect and retain the four Landmark Douglas-fir.

## VII. PROTECTIVE BARRIER

Before development, land clearing, filling, or any land alteration for which a Tree Removal Permit is required, the applicant:

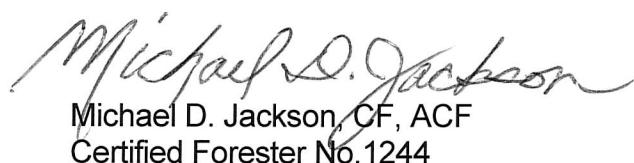

- Shall erect and maintain readily visible protective tree fencing along the outer edge and completely surrounding the protected area of all protected trees or groups of trees.
- Shall maintain the protective barriers in place until City of DuPont representatives authorize their removal.
- Shall ensure that any landscaping done in the protected zone subsequent to the removal of the barriers shall be accomplished with light machinery or hand labor.

## VIII. COMPLIANCE

To comply with the Tree Protection Plan/Landscape Plan, a Professional Forester or Certified Arborist is **required** to oversee the tree protection measures. The location of the protection fence needs to be known prior to any preconstruction meeting. Once the tree protection fence is installed the City of DuPont must be notified BEFORE land clearing can begin. Project Forester and their contact information needs to be shown on the site plan. (Mike Jackson, phone 360-280-9398).

If you have any questions regarding the trees on this project, please let us know.

Sincerely,

Michael D. Jackson, CF, ACF  
Certified Forester No.1244
